

JASON FRANCISCO MACAS MORA

SOFTWARE DEVELOPER

I am an Electronics and Telecommunications Engineer with an affinity for software issues. I worked as a private teacher and as a teaching assistant at my university, in the subjects of calculus, programming and physics. I am currently a web developer, focused on both the frontend section and backend themes (fullstack). And likewise I work in the area of artificial intelligence, being a developer and researcher of applications for the medical area.
